

Hi!

My name is Steven and I'm an Online Editor and Colorist based in LA. I work primarily in Resolve and Symphony, but I have meaningful experience with Adobe AE and PS as well. I have a very fine eye for detail and I'm incredibly organized. I had an AE tell me once he felt he "could eat a sandwich off the floor of my project" if that tells you anything about how I run a project. I love imaging technology and any chance I can get to immerse myself in it is one I'll usually take. We breathe life into entertainment, and that's something to always be proud of...

You can view my reel at www.stevenshaefer.com but I have additional color samples available upon request. I'm really looking forward to hearing from you!

Warmly,

Steven Shaefer
